REMEMBER THAT TIME YOU GOT STUCK AND COULDN'T MOVE FORWARD?

WE DON'T.

Wicked Problem Solving®

Learn from master design thinker, top consultant, TED alumnus, facilitation guru, author, Academy Award winner, and all-around happy guy, Tom Wujec.

For decades, Tom has helped transform companies using Wicked Problem Solving. He's bringing his life's work to you so you can learn his method and transform yourself, your team, your life, your world.

WHAT WILL I LEARN?

THE TOP SKILLS OF THE MODERN WORLD OF WORK, THAT'S WHAT.

You'll learn complex **problem solving**, **collaboration**, and **creativity**—the three most important skills of today, according to the World Economic Forum.

As WPS is the confluence of agile, lean, design thinking, and other modern ways of working, its goal is to improve how you work in your teams today by focusing on **asking the right questions**, **making ideas visible**, and **engaging with forward actions**. You will transform ideas from invisible concepts to tangible building blocks. The course will enable you to map out your options, sketch your ideas, and see your organizational challenges in a new light.

Enabled with **Miro**, a digital whiteboarding tool.
